

# Reading Accountability Without Quizzes

The Reading Integrity Suite is a set of features that helps schools ensure honest logging while preserving students' reading independence. Our simple yet effective system provides clear, actionable insights without quizzes or extensive grading on the part of educators. With built-in engagement strategies such as conversations with Benny, our AI-powered teacher's assistant, promoting reading integrity is easier than ever.

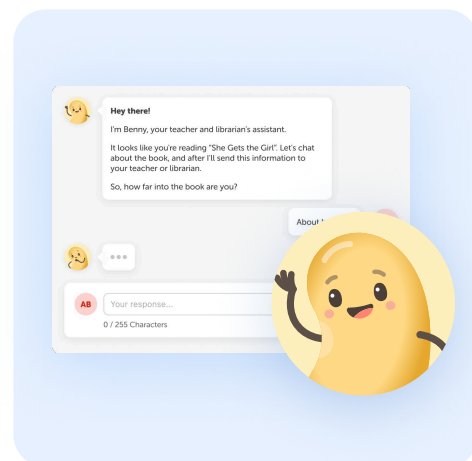

## Take a Closer Look System

Detect logging issues effortlessly with our proprietary system, which flags potential dishonest activity by analyzing suspicious characteristics like unusually short titles, logs exceeding school-set limits, and nonsensical titles without a valid ISBN.

## Verification and Freezing

Manage student participation while maintaining reading integrity. Verifying a reader allows voracious readers to exceed school logging limits, while freezing a reader's account helps you address issues with dishonest logging.

## Book Talks with Benny

Benny, our AI-powered teacher's assistant, unlocks valuable insights for educators by engaging students in a conversation about the book they're reading when we detect potentially dishonest logging. This feature is available for schools and districts with Premium Beanstack plans.

# Balancing Logging with Reading Engagement

Use engagement features such as leaderboards and book reviews, and watch motivation and participation soar as students engage more deeply with their reading.

RANK	READER	MINUTES LOGGED
1	Morganne	521
2	Olivia (You)	432
3	Wendy	331

## Use Social Tools to Create Transparency

Beanstack's social tools, like leaderboards and friends, foster accountability, deter exaggerated logging, and promote a supportive reading culture during class time and beyond.

**Set Log Type Limits**

Adjust the amount that can be logged by your site's users in one entry for the log types that you have enabled. Set a warning level for users to be questioned when their logging level is above the amount you set.

Type	Warning Level	Per Log Limit	Per Day Limit
Minutes	<input type="text" value="120"/>	<input type="text" value="180"/>	<input type="text" value="300"/>

Type	Min Characters	Max Characters
Reviews	<input type="text" value="50"/>	<input type="text"/>

## Log Limits and Settings

Set a schoolwide limit and require students to promise that their reading is honest when they log above that threshold. Other logging limits include requiring a book title and restricting logging to the past 90 days.

**Activities**

Read a Fantasy book. Which book did you choose?

What was your favorite part of the book?

**Write Review**

**The Hunger Games**  
Suzanne Collins

Olivia

Loved this book! It was so much fun to read! Can't wait for the next one!

78 / 500

## Encourage Student Reflection

Boost critical thinking and analysis with book reviews and short answer activities. Require a minimum character count for reviews and approve submissions for other students to view.
